

Aproaching US

■ US Accepted ■ US not complete

TEST CASE STATUS

■ No of PASSED TCs ■ No of FAILED TCs ■ No of BLOCKED TCs

A total of 3 defect reports opened

CRITICAL	HARD	MEDIUM	LOW
0	0	1	2

We can calculate the percentage of critical defects using

$$\text{Percentage of critical defects} = \frac{\text{No. of critical defects}}{\text{Total No. of defects}} \times 100$$

$$\text{Percentage of critical defects} = \frac{0}{3} \times 100 = \mathbf{0\%}$$
